

# United Kingdom solar generator prices

How much does a solar generator cost?

While solar generators are very affordable to run, they can be expensive to purchase initially. You should be able to find small solar generators for as little as £200, while large state of art generators with huge capacities may cost over £5000. Those designed for camping trips and caravan holidays will be at the cheaper end.

Are solar generators worth it?

Whether solar generators are "worth it" mostly depends on what you need and what your situation is. As an environmentally friendly option that makes clean energy with no harmful emissions, they're particularly useful in remote areas without access to the power grid or during power outages.

Are solar-powered generators a good idea?

With all the environmental issues the world continues to face, going solar is becoming a must. And solar-powered generators are just one of many new kinds of solar technology that can help cut emissions and costs. They are a lifesaver for portable power- whether that's for an off-road adventure or to reduce your reliance on the grid.

How many kWh can a solar generator power?

If you just need to charge your phone or run small appliances, there are solar generators with capacities as small as 200 Wh. Mid-range models range from 500 Wh to 2 kWh, so you can use them for longer periods or with bigger appliances. Larger, high-end models can go beyond 2.5-3 kWh and power heavy-duty devices or multiple things at the same time.

Where can I find a solar generator?

Discover our collection of solar generators at [Anker.com](https://www.anker.com) for endless power at home or away.

Can You Power Your House with a solar generator?

You could, in theory, power your house with a solar generator, but its capacity must match your household's energy needs. Larger solar generators, coupled with enough battery storage, can handle multiple appliances and systems. However, if you want constant power for your whole house, a complete solar panel system is usually your best bet.

Now let's look at the smaller array, and factor in generator fuel costs. Solar Panel Generator Capacity: 9 KW; Roof Orientation: SE facing, 20 degree tilt, no shade; Forty-Five 200 W Solar Panels: £8,100; House Battery: £10,500; 5.5 KW Petrol Generator: £1,200; Five Years Petrol Use: £2,000; Generator Inverter: £500; Solar Inverter: £1,300
