

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

How can the Vatican save CO₂?

In the heart of the Vatican, we converted 2,134 m² of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO₂ each year.

How can Vatican City achieve climate neutrality?

A. Climate neutrality can be achieved by Vatican City State primarily through the use of natural sinks, such as soil and forests, and by offsetting emissions produced in one area by reducing them in another. Of course, this is done by investing in renewable energy, energy efficiency or other clean technologies such as electric mobility.

How much water is saved in the Vatican Gardens?

A new watering system for the Vatican Gardens has also been installed, saving about 60% of water resources. The separate collection of urban waste has been encouraged, rising from 42% in 2016 to 65% in 2020, with a target of 75% by 2023.
