Like a traditional portable generator or inverter generator, a solar generator can power string lights and charge mobile devices when you're camping off the grid. It can also power corded tools at a project site where electrical outlets are out of reach. You can also use a solar generator as a backup to operate key items around your home in the event of a power outage.

A grid-tied inverter is also often used in grid-tied solar power systems to convert DC electricity from solar panels to AC power. Some systems include a backup generator for electricity during limited sunshine or grid interruptions.
