WeCo Energy Storage System Households tend to use most of their electricity during the evening and night time when the solar panels are no longer producing power. Even during the daytime, there is a constant mismatch between power produced by a solar array and consumption, so you are constantly importing or exporting electricity.

Each module is 5.3 kWh of usable energy, high energy density, extreme safety, innovative design. Plug & Play Rack High Voltage is the most compact Low Voltage stackable storage for domestic application, plug and play, compatible with several International Inverter
