Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

How much solar irradiation will the Faroe Islands produce in 2021?

At the same time, the plant is the first major photovoltaic system in the Faroe Islands, and although we are only in mid-November and solar irradiation in 2021 is more than 10% below normal levels, with 161,200 kWh it has already produced more than the estimated nominal production.

Are the Faroe Islands a sustainable country?

Did you know that the Faroe Islands is one of the world's leading nations in producing sustainable electricity with over 50% of the nation's electricity deriving from renewable energy sources? There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind.

Who is responsible for the power supply in the Faroe Islands?

SEV is obliged to supply power to all citizens, companies and organisations 24-hours a day. SEV has sole responsibility for power quality and the power supply system in the Faroe Islands. The Faroe Islands are an isolated island society. The option of buying electricity from neighbouring countries does not exist.
