

What is XPO low emission sustainable solution?

XPO leverages the potential of hydrotreated vegetable oil (HVO), B100, and other non-petroleum-based fuels derived from vegetable or animal sources. In April 2023, we launched the XPO Low Emission Sustainable Solution (LESS) - a decarbonisation initiative that gives road transport customers a way to replace diesel fuel with HVO in the fuel supply.

Does Togo have a potential for wind energy?

Togo's potential for wind energy is not high. Our study also identified a number of challenges with renewable energy, however. For example, the Togolese government needs to determine the generation potential from various renewable energy sources. The head of a renewable energy research centre said:

Does Togo have universal access to electricity?

Access has increased in Togo from 17% in 2000 to 53% in 2020. This is higher than the figure (43%) for all low income countries but has a long way to go. The small West African country plans to achieve universal access to electricity by 2030. Its main challenges are capacity, technology and expertise for generation.
