

Yetu smart grids New Zealand

Why is Yetu smart grids partnering with gridless compute?

Yetu Smart Grids is supporting Hydrobox in its partnership with Gridless Compute to monetise excess electricity on minigrids for sustainable data & crypto mining. This reduces the payback period of off-grid renewable energy projects and keeps the electricity prices for the community low.

How can New Zealand support smart grids?

For example, the Plugshare app helps electric vehicle owners find compatible chargers in their area, and is actively used in New Zealand. Local governments have been involved in supporting new smart technologies, including some that relate to smart grids and the new options they provide.

What are smart grids & how do they work?

Smart grids provide new options for sourcing, transporting and using electricity. These new options can benefit consumers in a variety of direct and indirect ways, and will give them the most meaningful opportunity they've had to shape the electricity industry so that it better reflects their needs and values.

CTO Yetu Smart Grids / Hydrobox. Founding Partner by Nubian & Rik is a respected guest speaker and well known in the world of smart buildings and DER (Distributed Energy Resources) . & It;br& gt;& It;br& gt;Thrilled by the idea that ...
